

Maximum Application of the WaterSmart Conservation and Customer Engagement Program (Booth 12) (/initiative/4WaS/maximum-application-of-the-watersmart-conservation-and-customer-engagement-program-booth-12)

The WaterSmart Conservation system provides customers with regular home water reports that put their usage in a social context, meaning they can see how they compare with their neighbors and other similar households. This system has been implemented in others areas and has resulted in net water savings of 4.6-6.6%.

This proposal is worthy of further research and evaluation by the panel of experts.

Jude Todd 2d, 16h ago

I think this proposal warrants further consideration by WSAC.
